

**Public Competition for Admission to PhD Programmes at
the
University of Milan
a.y. 2015/2016.**

UNIVERSITÀ DEGLI STUDI DI MILANO

Area Affari Istituzionali, Internazionali e Formazione

Divisione Formazione Universitaria e Formazione Permanente

FUFP/2

THE RECTOR

- having regard to Italian Ministerial Decree No. 270, dated 22 October 2004, entitled "Amendments to Regulation No. 509 containing rules governing the educational autonomy of Universities, passed by a Decree of the Ministry for Universities and Scientific and Technological Research on 3 November 1999";
- having regard to Article 4 of Italian Law No. 210, dated 3 July 1998, as amended by art. 19, paragraph 1, of Italian Law No. 240 dated 30 December 2010;
- having regard to Italian Regional Law No. 33, dated 13 December 2004, entitled "Rules governing Regional measures to ensure the right to study at university," which makes provisions for services in favour of students enrolled in PhD programmes;
- having regard to Italian Ministerial Decree No. 45 dated 8 February 2013, "Regulation containing the accreditation methods of the locations and PhD programmes and the criteria for the institution of PhD programmes by accredited bodies";
- having regard to the Charter of the University of Milan, issued by Rector's Decree dated 15 March 2012;
- having regard to the University Regulations regarding research doctorates issued by Rector's decree of 5 June 2015;
- having regard to the Ministerial decree protocol no. 644 of 19.08.2014 with which the Ministry of Education, Universities and Research (MIUR) grants five-year accreditation, equivalent to three consecutive cycles, to the doctoral research programmes presented by the University of Milan for the 2014/2015 academic year, subject to compliance with Ministerial Decree DM 45/2013, and without prejudice to the prescribed requirements;
- having regard to the fact that for the 2015/2016 academic year the University intends to activate a new cycle of doctoral programmes that have already been accredited pursuant to Italian Ministerial Decree No. 644/14;
- considering that the newly activated doctorates in *Comparative, private and civil procedural law, Public, international and European union law* and *Legal studies "Cesare Beccaria"* requires first accreditation according to Ministerial Decree DM 45/2013;
- having regard to the notes of MIUR protocol no. 10906 of 22 June 2015 and protocol no. 12595 of 15 July 2015;
- having regard to the decisions of the Academic Senate in the sessions of 17 February 2015 and 21 April 2015 and of the Board in the sessions of 24 February 2015 and 28 April 2015, concerning activation of the 31st doctoral cycle;
- having regard to the subsequent resolution of the Academic Senate in the session of 16 July 2015;
- in derogation of the dispositions of art. 15, par. 3 of the University PhD Regulations

HEREBY DECREES

Art. 1

Activation of PhD Programmes

UNIVERSITÀ DEGLI STUDI DI MILANO

Area Affari Istituzionali, Internazionali e Formazione

Divisione Formazione Universitaria e Formazione Permanente

The following PhD programmes are activated at the University of Milan for the academic year 2015/2016 (31st cycle), subject to confirmation of their accreditation by MIUR:

- Agricoltura, ambiente e bioenergia - *Agriculture, environment and bioenergy*
- Biologia molecolare e cellulare - *Molecular and cellular biology*
- Chimica - *Chemistry*
- Chimica industriale - *Industrial chemistry*
- Diritto comparato, privato, processuale civile e dell'impresa - *Comparative, private and civil procedural law*
- Diritto pubblico, internazionale ed europeo - *Public, international and european union law*
- Epidemiologia, ambiente e sanità pubblica - *Epidemiology, environment and public health*
- Filosofia e scienze dell'uomo - *Philosophy and human sciences*
- Fisica, astrofisica e fisica applicata - *Physics, astrophysics and applied physics*
- Informatica - *Computer science*
- Medicina clinica e sperimentale - *Clinical and experimental medicine*
- Medicina molecolare e traslazionale - *Molecular and translational medicine*
- Medicina sperimentale e biotecnologie mediche - *Experimental medicine and medical biotechnologies*
- Ricerca biomedica integrata - *Integrative biomedical research*
- Scienze ambientali - *Environmental sciences*
- Scienze biochimiche - *Biochemical sciences*
- Scienze del patrimonio letterario, artistico e ambientale - *Literature, arts and environmental heritage*
- Scienze della nutrizione - *Nutritional sciences*
- Scienze della terra - *Earth sciences*
- Scienze farmaceutiche - *Pharmaceutical sciences*
- Scienze farmacologiche sperimentali e cliniche - *Experimental and clinical pharmacological sciences*
- Scienze giuridiche "Cesare Beccaria" - *Legal studies "Cesare Beccaria"*
- Scienze matematiche - *Mathematical sciences*
- Scienze odontostomatologiche - *Oral sciences*
- Scienze per i sistemi alimentari - *Food systems*
- Scienze veterinarie e dell'allevamento - *Veterinary and animal science*
- Storia, cultura e teorie della società e delle istituzioni - *History, culture, social and institutional theories*
- Studi linguistici, letterari e interculturali in ambito europeo ed extra-europeo - *Linguistic, literary and intercultural studies in european and extra-european perspectives*

Public competitions for admission to the above PhD courses, based on qualifications and exams, are hereby announced by the University of Milan; the tables annexed to this decree, which are an integral part of this document, contain a brief description of the courses, the timetable of tests and the links to the university website where the research topics identified by the Teaching committee of each course, can be found. The criteria on which the selection of research topics is based are indicated in art. 21 of the University Regulations for doctoral study.

The number of scholarships may be increased if external funding becomes available before the deadline of the call for submission of applications.

Foreign candidates for doctoral courses with study grants from their governments may be admitted beyond the enrolment quota if they pass the admission tests required by the present decree.

Art. 2 Admission Criteria

UNIVERSITÀ DEGLI STUDI DI MILANO

Area Affari Istituzionali, Internazionali e Formazione

Divisione Formazione Universitaria e Formazione Permanente

In order to apply for a place in the PhD programmes, students must have a second-level degree, an equivalent qualification, or an equivalent qualification by study level (Master's Degree) from a foreign University.

The suitability of the foreign academic qualifications in terms of content is appraised by the Examining Board constituted for admission to each PhD programme, in compliance with the regulations in force in Italy and in the country in which the academic qualification was issued, and the international treaties or agreements pertaining to the conferment of qualifications for the continuation of studies.

Those without a second-level degree may also apply, but admission to the PhD programme is subject to achieving a second-level degree by 31 October 2015

Art. 3 Applications

Applications is made by completing the following steps **by 1pm, 31 August 2015**:

1. registering online on the University portal at the webpage www.unimi.it – Accesso rapido – Servizi – REGISTRAZIONE. This operation is not required by those already registered on the portal or in possession of University access credentials (final year students or those who graduated from the University of Milan less than a year ago);
2. accessing (by means of access credentials) the SIFA online services at www.unimi.it – Servizi online SIFA – LOGIN;
3. submitting an admission application through the following steps: *Servizi di ammissione – Ammissione ai corsi post laurea – Dottorati di ricerca*;
4. paying a non-refundable fee of €50 (for selection costs) by credit card or using the MAV form available online.

Applicants must upload the following files in pdf, .rtf or .jpg format, all under 10 MB:

- A. *Diploma Supplement*, issued by the university according to European Commission, Council of Europe and UNESCO/CEPES standards, or degree certificate in Italian or English from the university of provenance, indicating exams taken, corresponding grades and credits, and showing the statistical distribution of exam grades of each course. This document is not required of graduates/undergraduates of the University of Milan since it will be acquired internally.
- B. CV, describing any professional experience and other qualifications held by the applicant;
- C. research project ([according to Form 1 available here](#));
- D. copy of passport (only for foreign applicants);
- E. any publications;
- F. any request for telematic interview ([according to Form 3 available here](#));
- G. Annex A.

Italian citizens may self-certify in cases and manners provided for by the laws in force.

Failure to submit any of the documents A, B, C implies **exclusion from the competition**.

Qualifications and scientific publications may be in Italian or English.

In addition to the above documentation, on request by the Teaching committee and as specified in the course tables, applicants must provide two reference letters ([drafted according to Form 2 available here](#)) by the competition deadline, from persons who have had a role in their education. The reference letters in .pdf must be sent by e-mail directly by the said persons to the referent in charge of the PhD programme. In any case candidates may include reference letters written as indicated above with their application. Reference letters are considered part of the candidate's curriculum and no point score is assigned to them.

UNIVERSITÀ DEGLI STUDI DI MILANO

Area Affari Istituzionali, Internazionali e Formazione

Divisione Formazione Universitaria e Formazione Permanente

The online application cannot be modified or supplemented with further documentation once it has been confirmed.

It is possible to apply for a number of PhD programmes provided that applicants register properly for each of them, as described above, including payment of the non-refundable fee of €50.00 for each application submitted.

Art. 4

Provisions for Disabled Applicants

In compliance with Article 20 of Italian Law No. 104, dated 5th February 1992, if they consider it necessary, disabled applicants may request special aids and/or additional time for the competition exams. For this purpose, a medical certificate attesting the validity of the request must be provided by post by the deadline for competition entries. The necessary documentation should be sent to the University of Milan – Student Administration Division - PhD, Master's and International Students Administration Office, Via Festa del Perdono no.7 – 20122 Milan.

Art. 5

Admission exams

Admission to the PhD programme is made by public evidence selection procedure based on qualifications and exams that ensures comparative evaluation of candidates by committees formed and nominated as provided by laws in force.

Selection is intended to ascertain the qualifications, capacity and aptitudes of candidates for scientific research and their personal motivations. It is based on assessment of the **CV**, a **research project**, which may be inspired by the work of the second cycle degree thesis, and an **interview**. The research project, which should be based on a standard model (Form 1 available [here](#)), is only for selection purposes and does not limit the choice of doctoral thesis in the case of admission.

The CV and research project are assessed before the interview. The outcome of the assessment is available on the web page indicated in the table for each programme.

The CV is evaluated on the basis of the candidate's whole university career, publications, professional experience and other qualifications, if any. A **maximum score of 20 points** can be assigned to the **CV**. In assigning the points the committees consider the conditions and the period over which the candidate has obtained his qualifications. A **maximum of 10 points** can be assigned to the **research project**. **Candidates scoring at least 50% of the maximum for the CV and project may be interviewed.**

The interview is public; the date is indicated in the tables. The aim is to verify the candidate's knowledge of the field of the doctorate. The interview includes a seminar-style presentation of the research project, followed by general discussion to verify the candidate's expertise, scientific qualities and motivations. A **maximum of 70 points** may be assigned to the **interview**.

The interview is conducted in the language indicated in the doctoral programme table; in any case, candidate's may ask to be interviewed in English.

Before the interview, candidates for the doctoral programme in *Linguistic, literary and intercultural studies in European and extra-European perspectives* must sit for a test of their proficiency in the language of specialisation indicated in the research project. The test is to determine whether or not the candidate is eligible to enrol in the programme.

To sit for the tests, candidates must show one of the following identity documents: a) identity card; b) passport; c) driving licence (Italian).

UNIVERSITÀ DEGLI STUDI DI MILANO

Area Affari Istituzionali, Internazionali e Formazione

Divisione Formazione Universitaria e Formazione Permanente

If they have special reasons to do so, foreign candidates who do not live in Italy can take the interview via internet through applications that ensure their identification. They must apply by filling in and uploading Form 3 (available [here](#)).

At the end of each interview session, the committee makes a list of the candidates examined and their point scores. The list is signed by the president and the secretary of the Committee and posted the same day on the noticeboard of the premises where the interview was held.

At the end of the tests, the committee draws up a general ranking list according to the total score assigned to the candidates for their CV, research project and interview. The PhD admission exam is passed by candidates who **score at least 70/100**.

The general ranking list is published via SERVIZI ON LINE Sifa - Graduatorie ammissioni post laurea – on the University website <http://www.unimi.it> in the days following the examinations.

The Committees begin their work on the date indicated in the tables of the different doctoral programmes and must conclude it by **21 September 2015**.

Art. 6 Course Admission

Applicants are admitted to the courses according to their position in the ranking list until the number of places available for each PhD programme has been filled. Where applicants achieve the same score, preference will be given to the younger applicant, with the exception of the right of priority criterion for PhD grants set forth in art. 8 of this call for applications. The rankings of eligible applicants will be published in the days following the interviews on the University website <http://www.unimi.it> SERVIZI ON LINE Sifa - Graduatorie ammissioni corsi post laurea.

Applicants admitted to the courses lose their entitlement if they fail to enrol by the deadlines. Their place is then given to the next applicant in the ranking list. This also applies if an admitted applicant withdraws within three months of the beginning of the programme. If the withdrawing student has already received any monthly scholarship payments, he/she is required to return them. The methods and deadlines for takeover applicants are published on the University website in the period of publication of the rankings.

Applicants ranked in more than one list can only choose one PhD programme.

Art. 7 Registration

Applicants admitted to PhD courses must enrol online in the period 25-30 September 2015 using Sifa SERVIZI ON LINE as indicated on the University website <http://www.unimi.it/ricerca/dottorati/15706.htm>.

PhD applicants must pay a fee of €980 for accessing and attending PhD programmes in the academic year 2015/2016; this includes the regional study tax, insurance premium for accidents and stamp duty. Students who withdraw from the doctoral programme are not entitled to reimbursement of enrolment fees already paid.

Beneficiaries of PhD scholarships granted by the University are exempted from payment of the fee for accessing and attending PhD courses.

Beneficiaries of scholarships from the Ministry of Foreign Affairs and PhD applicants with invalidity greater than 66% and/or with recognised handicap according to Law 104/92, are exempted from

UNIVERSITÀ DEGLI STUDI DI MILANO

Area Affari Istituzionali, Internazionali e Formazione

Divisione Formazione Universitaria e Formazione Permanente

payment of the PhD enrolment fee and are only required to pay the sum of €166.29 for the regional study tax, insurance premium for accidents and stamp duty.

Applicants who hold a foreign academic qualification must also show the originals (and provide a copy) of the following documents to the International Students office (Via Santa Sofia no. 9/1 - 20122 Milan) by their enrolment date:

- a) university qualification;
- b) Italian translation of the qualification, done by an official translator, certified according to existing regulations;
- c) "certificate of equivalence of qualification" to be requested from the Italian diplomatic office in the country in which the qualification was obtained;
- d) tax code;
- e) stay permit (only for non-EU applicants).

The documents in paragraph b) and c) may be replaced by a Diploma Supplement issued by the university according to European Commission, Council of Europe and UNESCO/CEPES standards. The University reserves the right to request the "certificate of equivalence of qualification" where any doubt arises regarding the validity of the qualification.

Verification of the validity of foreign qualifications is made on consignment of the official documents. Until then, candidates are admitted to the course provisionally and may be excluded should they turn out not to have the necessary requisites.

Art. 8 Scholarships

The scholarship is granted, in accordance with and by the methods established by existing regulations, in line with the ranking list and consists of an annual gross sum of €13,638.47. The amount of the scholarship is exempt from IRPEF income tax in accordance with art. 4 of Italian Law no. 476 of 13th August 1984 but subject to social security contributions according to article 2, paragraph 26 et seq., of Italian Law no. 335 of 8th August 1995.

In the event of equal merit, the scholarships are assigned on the basis of the candidates' economic situation, as expressed by the indicator of equivalent economic situation (ISEE).

The regional study tax and an expenses charge will be deducted from the scholarship for a total sum of €166.29.

Scholarships have a yearly duration and are renewed if the Teaching committee promotes the PhD student to the following year on the basis of yearly performance.

Starting from the second year, in addition to the scholarship and depending on the financial resources of the University budget, each PhD student is given an amount for research in Italy and abroad suited to the type of course and in any case not less than 10% of the amount of the scholarship itself.

Art. 9 Obligations of PhD Students

Research doctoral programmes include 1500 hours per year of tuition/teaching and research. The duties and rights of students are set out in art. 22 of the University PhD Regulations.

Art. 10 Achievement of Qualification

UNIVERSITÀ DEGLI STUDI DI MILANO

Area Affari Istituzionali, Internazionali e Formazione

Divisione Formazione Universitaria e Formazione Permanente

The qualification of Doctor of Philosophy, abbreviated "PhD", is awarded under the conditions indicated in art. 23 of the University PhD Regulations.

Art. 11 Personal Data Processing

In accordance with its Regulation issued in application of Legislative Decree no. 196 of 30th June 2003, the University undertakes to safeguard the confidential nature of the information provided by applicants; all data provided is processed solely for purposes related to the competition and possibly for managing the applicant's relationship with the University, in compliance with current laws.

Art. 12 Relevant Regulations

Any items for which no specific provision has been made in this call for applications are regulated in accordance with the Italian legislation and regulations governing PhDs.

Art. 13 Person in charge of the procedure

According to Law no. 241 of 7 August 1990, the person in charge of the present competition is Dr. Emanuela Dellavalle (Director of the Student and Course administration office).

Milan, 20 July 2015

DOCTORAL PROGRAMME IN AGRICULTURE, ENVIRONMENT AND BIOENERGY

Learning Objectives	<p>Our planet is experiencing a decline in its non-renewable resources and is exposed to risks deriving from climate change. The agricultural sector must supply food, non-food products, ecosystemic services and energy, whilst guaranteeing safety and food sovereignty. It is therefore essential to develop advanced training courses in order to achieve efficiency and sustainability in the agricultural sector and its various territorial contexts, taking into account the various elements of the production system and their organisation in agro-ecosystems. Reference will be made to:</p> <ul style="list-style-type: none"> a) phenotypic and genotypic features and the valorisation of genetic resources; b) containment of biotic and abiotic adversities; c) implementation of predictive IT models; d) bioenergy production, use of residual substances, soil and water resource conservation; e) analysis and management of technical means, agricultural processes, multi-functionality of rural areas and of agrobiodiversity. <p>The programme will enable researchers to:</p> <ul style="list-style-type: none"> a) develop autonomous research; b) prepare and propose public and private research projects on a local, national and international level; c) identify research needs and their scientific, social and economic relevance; d) transfer knowledge through teaching activities and the presentation of data and results; e) transfer research results to the public and private sphere.
Academic disciplines	05/A (Plant Biology) 07/A (Agricultural Economics and Rural Surveying) 07/B (Agricultural and Forestry Cultivation Systems) 07/C (Agricultural, Forestry and Biosystems Engineering) 07/D (Plant Pathology and Entomology) 07/E (Agricultural Chemistry and Genetics) 07/G (Animal Science and Technology) 07/H (Veterinary Medicine)
Duration	3 years
Places available	10
Scholarships	8 University of Milan

DOCTORAL PROGRAMME IN CHEMISTRY

Learning objectives	<p>The doctoral programme aims to train students in the critical analysis of scientific research problems in the field of chemistry, and to provide them with the skills required to identify and pursue important research objectives. The programme is designed to develop professionals who will be able to work in industry, in private and public institutions, and in academia.</p> <p>Students will acquire all the knowledge and working methods necessary to carry out research activities to very high scientific standards in any of the numerous interdisciplinary fields of Chemistry. The central role of Chemistry in modern life is widely acknowledged today. This field of science intersects with several other scientific disciplines (such as physics and biology) and therefore finds application in many different fields, from medicine to nanomaterials, from agriculture to energy, from biology to electronics, from cultural heritage conservation to environmental protection. The input of advanced chemical research is essential in many other scientific disciplines and for the development of production in modern countries.</p> <p>Doctoral programmes in Chemistry are offered in the following lines of research: 1. <i>Synthesis, reactivity, reaction mechanisms, catalysis</i>; 2. <i>Structural chemistry, spectroscopic analysis</i>; 3. <i>Theoretical and computational chemistry</i>; 4. <i>Solid-state, interphase and electrolyte chemistry</i>; 5. <i>Chemistry of biologically active compounds, food and natural substances, biocatalysis</i>; 6. <i>Chemistry of the environment and of cultural heritage</i>; 7. <i>Chemistry of materials, chemistry for nanotechnologies, supramolecular chemistry, chemistry for energy</i>.</p> <p>An important aspect of the programme is that students meet foreign researchers and come into contact with internationally renowned research institutes. To this end, a significant part of teaching activities is assigned to foreign lecturers and students are given the opportunity to spend time in research institutions abroad.</p>

DOCTORAL PROGRAMME IN INDUSTRIAL CHEMISTRY

Learning Objectives	<p>The general theme of the doctoral programme relates to the extensive field of application of chemistry to industrial processes. It aims to train students in understanding theoretical and practical problems, as well as economic, environmental and safety issues. Graduates will possess considerable scientific expertise and be able to organise and manage research activities, as well as analyse the aspects pertaining to variations in scale. The main research areas are: physical chemistry and catalysis in industrial processes; industrial electrochemistry and corrosion; synthesis, properties and structure of polymers; synthesis and processes of fine chemistry; synthesis, processes and control in primary chemistry; chemical biotechnology; innovative chemical processes; new structural and functional materials; innovative energy technologies; nanotechnologies.</p> <p>An important aspect of the programme is that students meet foreign researchers and come into contact with internationally renowned research institutes. To this end, some teaching activities are assigned to foreign lecturers and students are given the opportunity to spend time in research institutions abroad.</p>
Academic disciplines	03/A (Analytical, chemical-physical) 03/B (Inorganic, technological) 03/C (Organic, industrial) 09/D (Chemical and Material Engineering)
Duration	3 years
Places available	6
Scholarships	6 University of Milan
Contact person for the doctoral programme	Prof. Dominique Roberto, full professor in the CHIM/03 scientific-disciplinary sector dominique.roberto@unimi.it
Admission Criteria	Academic qualifications obtained in one of the following classes under Ministerial Decree 270/2004, or one of the corresponding classes under Ministerial Decree 509/99: LM-8 Industrial Biotechnology, LM-13 Pharmacy and Industrial Pharmacy, LM-17 Physics, LM-22 Chemical Engineering, LM-53 Material Sciences and Engineering, LM-54 Chemistry, LM-71 Industrial Chemistry.
Reference letters	The Teaching committee requires that two reference letters, drawn up according to Form 2 (available here), be sent by email to the referent.

Doctoral programme selection phases:

DOCTORAL PROGRAMME IN COMPARATIVE, PRIVATE AND CIVIL PROCEDURAL LAW

Learning objectives	The programme aims to promote scientific debate among experts who give the programme an interdisciplinary character while (given the links between the scientific sectors involved) providing a common perspective, so that discussion among jurists of differing competencies is fruitful and rich. Its main objective is that of adequately structuring and linking research training activities, focusing on comparative law with the aim of intensifying scientific debate among those studying private law, business law (in its two forms, commercial/industrial and occupational) and civil procedural law. Special attention is given to the formation of students in the methodological aspects of scientific research. The affinities among the various areas of legal studies addressed by the programme will allow for in-depth discussion during lecture series on cross-sector topics. As in the past, authorities in the field will be involved and collaborations with universities and foreign researchers will be intensified.
Academic disciplines	12/A (Private law) 12/B (Commercial, maritime and labour law) 12/E (International, European Union, comparative and financial market law) 12/F (Civil procedural law)
Duration	3 years
Places available	8
Scholarships	8 University of Milan
Contact person for the doctoral programme	Prof. Maria Teresa Carinci, full professor in the IUS/07 scientific-disciplinary sector mariateresa.carinci@unimi.it
Curricula	<ol style="list-style-type: none">1. Private Law2. Comparative Law3. Corporate Law and Securities Regulation4. Labour Law, Industrial Relations and Social Security Law5. Civil procedural Law
Admission criteria	Academic qualifications obtained in one of the following classes under D.M. 270/2004, or one of the corresponding classes under D.M. 509/99: LM-81 Development cooperation, LMG/01 Law.

Doctoral programme selection phases:

DOCTORAL PROGRAMME IN PUBLIC, INTERNATIONAL AND EUROPEAN UNION LAW

Learning objectives	<p>The doctoral programme contributes to the scientific and methodological development of topics addressed by integrating the various areas of research. Topics of study (and comparative study) include the foundations of constitutional law (nature and transformation of political representation, relationships among institutions, role of judges, protection of rights), as well as the complexity of modern administrative law. The latter increasingly involves cooperation among national, European and international administrations in a complex web of duties and responsibilities.</p> <p>The programme aims to provide in-depth knowledge of research methodologies in the various areas of International Law, International Private and Procedural Law and European Union Law, from the perspective of both institutional profiles and material rights. The profound ongoing changes in the international community, the increase in transnational relations between individuals and businesses, and the increasing competencies of the European Union are such that the different aspects of legal research must be placed in an international and European context.</p> <p>There are essentially three lines of study: a) protection of rights; b) the functioning of single institutions; c) the bases of rights from the perspective of the different areas of law addressed by the programme.</p>
Academic disciplines	<p>12/C (Constitutional and ecclesiastical law) 12/D (Administrative and tax law) 12/E (International, European Union, comparative and financial market law)</p>
Duration	3 years
Places available	9

DOCTORAL PROGRAMME IN EPIDEMIOLOGY, ENVIRONMENT AND PUBLIC HEALTH

Learning Objectives	<p>The doctoral programme focuses on training professionals and researchers who can contribute to the development of research methodologies in healthcare, from laboratories to clinics, from prevention to services for the protection and promotion of health in individuals and populations, in living environments and work places and in the application of economic principles to healthcare systems management.</p> <p>Students will acquire a solid preparation in the quantitative disciplines required to devise and analyse studies for the identification of the determining factors of a disease and prognostic factors, of diagnostic-therapeutic programmes and of clinical research studies. Research will focus largely upon systems for the prevention and control of infectious diseases, including paediatric and chronic-degenerative diseases and those related to food, work and assistance. This will involve predictive modelling of disease risks and/or genetic susceptibility and cost/benefit analysis of possible prevention policies. The programme will also examine issues relating to work, environment and health, focusing research on topics of great social and healthcare importance; this cutting edge research will be of interest to many regulatory bodies and qualified research centres.</p>

DOCTORAL PROGRAMME IN PHILOSOPHY AND HUMAN SCIENCES

Learning Objectives	The doctoral programme in Philosophy and Human Sciences is a brand new higher education programme which integrates the skills required for theoretical and experimental research in disciplines such as anthropology, geography, linguistics, psychology and cognitive science, social science, art theory and criticism with the findings of philosophical research, both theoretical and historical. The programme makes use of the multidisciplinary skills of the Board of Lecturers and aims to provide extensive knowledge in specific sectors of basic and applied research. It promotes innovative and cutting-edge research in areas requiring the ability to master theories, methods and techniques from various fields. In particular, the programme aims to provide students with a solid philosophical and scientific grounding in one of the following research areas: (i) History of philosophical and scientific thought (ii) Ethics and political thought (iii) Image theory and phenomenology of experience (iv) Logic and theory of languages (v) Philosophy of mind and cognitive science (vi) Anthropology and territory.
Academic disciplines	01/B (Computer Science) 05/D (Physiology) 10/G (Glottology and linguistics) 10/L (English and Anglo-American studies) 10/M (Germanic and Slavic Languages, Literature and Culture) 11/A (History) 11/B (Geography) 11/C (Philosophy) 11/E (Psychology) 14/B (Political History)

DOCTORAL PROGRAMME IN PHYSICS, ASTROPHYSICS AND APPLIED PHYSICS

Learning objectives	<p>The main theme of this doctoral programme is physics in advanced sectors of pure and applied research. Research covers all areas of modern physics, as indicated in the 5 curricula which aim to facilitate the placement of doctoral students in specific sectors.</p> <p>The required basic training is guaranteed by a combination of courses specific to this programme and others exceptionally borrowed from the second cycle degree programme, with examinations at the end of the first year. Moreover, doctoral students are required to attend an International School, with final assessment through a public seminar. The programme also provides various opportunities for discussion and exchanges among students in different programmes, particularly during a workshop at the end of the academic year.</p> <p>Training is supplemented by coordinated series of subject-specific conferences ("Physics Colloquia"). At the same time, doctoral students will have to undertake original research under the guidance of a tutor and a co-tutor and report on their progress through annual seminars during which students present their findings to the University's scientific community. This programme also offers internships in Fundamental Physics or High Technology at National and International Laboratories and private Research Laboratories.</p>
Academic disciplines	02/A (Physics of basic interactions) 02/B (Material physics) 02/C (Astronomy, Astrophysics, Earth and Planetary Physics) 09/E (Electric and electronic engineering and measurements)

DOCTORAL PROGRAMME IN CLINICAL AND EXPERIMENTAL MEDICINE

Learning Objectives	<p>The doctoral programme aims to train doctors who are able to conduct clinical research on pathogenesis, diagnosis, prognosis and therapeutic support in the main pathologies of internal and specialised medicine. All approaches will start from a clinical 'bedside' approach and will then be transferred to laboratory research or animal models and vice-versa. There will be collaboration with diagnostic, biotechnology and pharmaceutical companies with the aim of implementing collaborative studies in these fields. Such collaborations may facilitate job placement. Moreover, there will be collaborative work with research bodies and Italian and foreign universities, where doctoral students can complete periods of training and work.</p> <p>Research will mainly focus on:</p> <ul style="list-style-type: none">- hepatology and gastrointestinal diseases- infectious diseases- diseases of the endocrine system- haemostasis and thrombosis- cardiovascular diseases- medical emergencies- bronchopulmonary pathologies
Academic disciplines	06/A (Pathology and Laboratory Diagnostics) 06/B (General Clinical Medicine) 06/D (Specialised Clinical Medicine) 06/L (Clinical Anaesthesiology)

DOCTORAL PROGRAMME IN MOLECULAR AND TRANSLATIONAL MEDICINE

Learning Objectives	Doctoral programme activities fall within the framework of the "Life Sciences" and their biomedical application, providing students with an understanding of the biological and physiopathological basis for treating and preventing diseases. The main objective is to provide unifying cross-sector knowledge and technologies which, in the post-genomic era, can combine basic, formerly distinct medical disciplines (biochemistry, biology, molecular biology, physiology, pharmacology, general pathology, immunology, genetics, virology, anatomical pathology) with applied medical sciences and medical research. Long-standing collaborations with industries in the fields of diagnostics, pharmaceuticals, IT and design of scientific equipment will be strengthened. This proves the interest of biotechnological and biomedical companies, which consider the activities of this programme as a concrete opportunity to step into or strengthen their presence in a steadily developing sector. At the same time, these collaborations represent a job placement opportunity.
Academic disciplines	05/E (Experimental and Clinical Biochemistry and Molecular Biology) 05/F (Applied biology) 05/I (Genetics and microbiology) 06/A (Laboratory Pathology and Diagnostics) 06/B (General Clinical Medicine) 06/D (Specialized Clinical Medicine) 06/I (Clinical radiology) 06/N (Applied Medical Technologies)

DOCTORAL PROGRAMME IN EXPERIMENTAL MEDICINE AND MEDICAL BIOTECHNOLOGIES

Learning Objectives	The doctoral programme focuses on the development and use of preclinical experimental approaches, advanced biotechnological and diagnostic laboratory methodologies for different fields of research on the aetiopathogenesis of human pathologies. Its main objectives are those of providing students with advanced technological and methodological skills in biomedicine, the ability to devise and complete research projects autonomously and to present experimental results. The programme also promotes exchanges with Italian and international research institutions and advanced training schools to achieve a high degree of internationalisation, also by involving foreign lecturers in research and training activities, enrolling foreign students and activating co-tutored individual programmes.
Academic disciplines	05/E (Experimental and Clinical Biochemistry and Molecular Biology) 05/F (Applied Biology) 05/G (Experimental and Clinical Pharmacological science) 06/A (Pathology and Laboratory Diagnostics) 06/B (General Clinical Medicine) 06/D (Specialised Clinical Medicine) 06/N (Applied Medical Technologies) 06/M (Public healthcare)

DOCTORAL PROGRAMME IN INTEGRATIVE BIOMEDICAL RESEARCH

Learning Objectives	The course aims to provide students with skills in the scientific and project management methods applied to basic and applied physiological and morphofunctional research in the fields of biomedicine and sport. Lecturers aim to promote integrated qualitative and quantitative studies on biological, morphological and physiological aspects of biological structures at every level of structural organisation, from cells to tissues, from organs to the whole human body, their alterations and interactions between people and the environment. The convergence of biomorphological and physiological approaches is particularly important for those who wish to undertake advanced research in the field of biology and cell physiology, focusing in particular on the relationship between structure and function in cell membranes, where anatomy and physiology find room for synthesis and integration, on the nervous and endocrine systems, motor control, biomechanics of movement and locomotion, and on physical and sports activities.
Academic disciplines	05/B (Animal biology and anthropology) 05/D (Physiology) 05/F (Applied Biology) 05/G (Experimental and Clinical Pharmaceutical Sciences) 05/H (Human anatomy and histology) 06/B (General Clinical Medicine) 06/D (Specialised Clinical Medicine) 06/F (Integrated Clinical Surgery) 06/I (Clinical radiology) 06/M (Public healthcare) 06/N (Applied Medical Technologies) 09/G (Systems engineering and bioengineering) 11/D (Pedagogy)
Duration	3 years
Places Available	11
Scholarships	9 University of Milan 1 IBFM-CNR. 1 Dipartimento di Scienze farmacologiche e biomolecolari
Contact person for the doctoral programme	Prof. Chiarella Sforza, full professor in the BIO/16 scientific-disciplinary sector chiarella.sforza@unimi.it
Curricula	1. Molecular and Cellular Physiology 2. Morphology 3. Neurosciences 4. Sport Sciences 5. Systems Physiology
Admission criteria	All classes of second cycle degrees
Reference letters	The Teaching committee requires that two reference letters,

DOCTORAL PROGRAMME IN ENVIRONMENTAL SCIENCES

<p>Learning Objectives</p>	<p>The doctoral programme provides solid preparation and training in research in the various fields typical of Environmental Sciences, promoting interdisciplinary interaction of students with Italian and foreign research groups and with institutions that, in various capacities, study and manage the environment, land and human health.</p> <p>The primary objectives of the programme include providing and building the following:</p> <ul style="list-style-type: none">- awareness and adequate knowledge of the multiple methodological, instrumental, analytical, statistical and model-based approaches to study of the environment;- the skill to perform interdisciplinary integration and synthesis of know-how resulting from the study of the various components of environmental systems and their complex interactions;- qualification and scientific productivity as preparatory elements for a career in research institutes or other professional frameworks. <p>The doctoral programme in Environmental Sciences is highly interdisciplinary, centred on ensuring high standards of learning in the integrated study of complex environmental systems regarding:</p> <ul style="list-style-type: none">- biodiversity expressed at all levels of organisation, from genetic to molecular/metabolic and cellular, and to the organisation of organisms, populations and communities;- relations at all organisational levels between bioethical factors, and between the latter and the abiotic environment, even in its anthropogenic components;- diachronic and other interactions between humans and the environment in terms of effects of human activities and disturbance on highly natural environments and of the quality of living and working environments on toxicological risk and health hazards. <p>The programme particularly focuses on certain general themes in which members of the Faculty Committee have particular competence, namely:</p> <ul style="list-style-type: none">- analysis of natural environments and those disturbed by humans; study of environmental pollution and its ecotoxicological consequences, especially the effects and mechanisms of action of exposure to contaminants (xenobiotics, endocrine disrupting agents, atmospheric particulate), and environmental stress on biological processes, <i>in vivo</i> and <i>in vitro</i> (damage to the DNA and to proteins, cell damage, reproductive anomalies, developmental changes, teratogenesis and other biomarkers in animal and human models), and genetic, epigenetic and molecular mechanisms that control the cell cycle and metabolism, or that form the molecular basis for resistance to parasites (in plant models);- study of plant and animal models of genetic and

DOCTORAL PROGRAMME IN BIOCHEMICAL SCIENCES

Learning objectives	<p>The doctoral programme promotes training and research in the field of biochemical, biotechnological and clinical sciences applied to biological, agri-food, veterinary and medical sciences, to promote and maintain human health, improve industrial and agri-food production and, in a broad sense, solve problems that concern the wellbeing of individuals and society.</p> <p>It is presented as an interdepartmental initiative designed to encourage cooperation and establish relations based on information exchange with high multidisciplinary standards with Italian and international research institutions, and with advanced education institutions, as well as cooperation with entrepreneurial production sharing the same interests.</p> <p>The principal objective of the doctoral programme is to achieve international acknowledgement by involving foreign teaching staff in structured research and training activities, enrolling foreign doctoral students, enabling dissertations jointly organised by both universities, and promoting study and research periods abroad for doctoral students.</p>
Academic disciplines	02/B (Material Physics) 05/E (Experimental and Clinical Biochemistry and Molecular Biology) 06/D (Specialized Clinical Medicine) 06/N (Applied Medical Technologies)

DOCTORAL PROGRAMME IN LITERATURE, ARTS AND ENVIRONMENTAL HERITAGE

Learning objectives	The doctoral programme in Literature, arts and environmental heritage is structured around two central ideas: the “text” (broadly considered as the product of intentional creative action), its history and success, the forms of its production and reception; the “context” or overall historical and environmental circumstances in which production of the text takes place. The new structure issues from experience developed during previous doctoral programmes in Classical Antiquity, History of Italian language and Literature, Cultural and Environmental Heritage Sciences. The cultural contents typical of the various sectors (philology, literature and linguistics, history and classical antiquity, archaeology, history of art, of music and of performing arts, human environmental sciences) will be studied in depth, developed and reorganised in a multidisciplinary whole.
Academic disciplines	10/A (Archaeology) 10/B (Art History) 10/C (Music, Drama, Cinema, Television and Audiovisual Media) 10/D (Classical Antiquity) 10/E (Middle Latin and Romance Philologies and Literature) 10/F (Italian Studies and Comparative Literature) 10/G (Glottology and Linguistics) 10/N (Eastern Cultures) 11/A (Historical Disciplines) 11/B (Geography) 11/C (Philosophy) 11/E (Psychology)
Duration	3 years
Places available	7
Scholarships	7 University of Milan

DOCTORAL PROGRAMME IN NUTRITIONAL SCIENCES

Learning objectives	The doctoral programme in Nutrition Sciences promotes integrated multidisciplinary and translational training to tackle physiological problems and pathological processes over the entire life cycle, from conception and pregnancy to geriatrics, with special reference to chronic-degenerative diseases, such as tumours, cardiovascular and neurological diseases related to lifestyle and particularly nutrition. The doctoral programme will also provide in-depth knowledge of animal nutrition and food safety with special reference to innovative nutritional strategies to improve foodstuffs that can be beneficial to human health.
Academic disciplines	03/D (Pharmaceutical, Technological, Nutritional) 05/D (Physiology) 05/E (Experimental and Clinical Biochemistry and Molecular Biology) 05/G (Experimental and Clinical Pharmacological Sciences) 06/A (Pathology and Laboratory Diagnostics) 06/B (General Clinical Medicine) 06/C (General Clinical Surgery) 06/D (Specialised Clinical Medicine) 06/F (Integrated Clinical Surgery) 06/G (Clinical Paediatrics) 06/H (Clinical Gynaecology) 06/N (Applied Medical Technologies) 07/B (Agricultural and Forest Cultivation Systems) 07/D (Entomology and Plant Pathology) 07/E (Agricultural Chemistry and Genetics) 07/G (Animal Sciences and Technologies) 07/H (Veterinary Medicine) 11/E (Psychology)
Duration	3 years

DOCTORAL PROGRAMME IN EARTH SCIENCES

Learning objectives	<p>The doctoral programme in Earth Sciences aims to train young researchers to investigate a broad range of geoscience topics. The programme is designed to provide advanced specialist training in (1) basic, applied and theoretical research on problems related to the structure, composition, evolution and dynamics of the Earth; (2) characterisation and modelling of the Earth System, and (3) basic and applied research on land use, natural risks, energy and water resources, geomaterials, prospecting for minerals.</p> <p>The geological perspective of the overall functioning of the Earth System includes research centred on the processes at work on the surface and inside the Earth, on their impact on ecosystems and human activities and, conversely, the short and long-term consequences of human activity on the environment. The complex interactions between geosphere, biosphere, atmosphere and hydrosphere are stored in the geological record, which can be decoded to: a) trace the development and evolution of our planet by combining experimental observations and models; b) define natural resources (oil, gas, mineral raw materials, water), their use and sustainable exploitation; c) evaluate geological risks (e.g., earthquakes, volcanic eruptions, floods, landslides); d) design geological engineering works and infrastructures; e) implement environmental reclamation technologies; f) develop exploitation of raw materials for industrial applications; g) preserve and make the most of our cultural geopaleontological heritage; h) evaluate forensic applications.</p> <p>The learning programme is organised to meet teaching and research requirements related to the broad spectrum of geosciences. The research themes developed during the doctoral programme in Earth Sciences are highly topical with extensive international significance, as witnessed by close cooperation with leading international research institutions. Special attention is dedicated to training researchers to tackle complex research topics in an independent and innovative manner. Training of doctoral students includes short courses and workshops, working experience in Italian and international institutions/laboratories, collaboration with industry, participation in Italian and international conferences and workshops, and other activities focused on overall training.</p>

DOCTORAL PROGRAMME IN PHARMACEUTICAL SCIENCES

Learning objectives	<p>The doctoral programme is designed to train highly skilled doctors to work successfully in the industrial and academic fields, and in the sector of medicines and healthcare products. The training, which aims at providing advanced methodological knowledge and scientific content in the pharmaceutical sector, includes theory and research, both centred on the design, synthesis, development and control of new biologically active compounds, new pharmaceutical forms, special foods, cosmetics, biocides and medical devices, typical of the fields covered in the doctoral programme:</p> <ul style="list-style-type: none">- Design and synthesis of biologically active compounds- Pharmaceutical, biopharmaceutical and toxicological analysis- Drug metabolism and pharmacokinetics- Pharmaceutical technology and legislation- Food chemistry and food supplements- Fermentation chemistry and biotechnology- Advanced synthetic methodologies- Physico-chemical characterization of biologically active compounds- Herbal drugs, botanicals and active ingredients of plant origin- Statistical methods for experimental data processing.
Academic disciplines	03/A (Analytical, chemical-physical) 03/B (Inorganic, technological) 03/C (Organic, industrial) 03/D (Pharmaceutical, technological, nutritional) 05/A (Plant biology)

DOCTORAL PROGRAMME IN EXPERIMENTAL AND CLINICAL PHARMACOLOGICAL SCIENCES

Learning objectives	<p>The doctoral programme, a third cycle programme, makes the most of the multidisciplinary knowledge of the Board of Lecturers to train pharmacologists expert in the latest applicational aspects of pharmacology, including: physiopathological and biomolecular investigational notions for finding therapeutic tools highly specific for single diseases and individual patients; investigational tools to study the mechanism of action, pharmacological/therapeutic effects and undesirable or potentially toxic aspects of active compounds, including those of plant origin (pharmacognosy); innovative technologies with high qualitative and quantitative standards for development, preclinical evaluation and clinical use of drugs; toxicological expertise in identifying potential adverse effects of active ingredients in the preclinical and clinical phases of a study, including the definition of criteria to protect health against hazards resulting from direct intake (e.g., medications, food additives) or indirect intake (e.g., environmental pollutants, industrial solvents) of chemical, physical and biological agents.</p> <p>Students will develop “pharmacological” competence useful for academic and industrial research, allowing effective “bench to bed” transfer and a multidisciplinary approach essential for public health.</p>
Academic disciplines	05/G (Experimental and Clinical Pharmacological Sciences)

DOCTORAL PROGRAMME IN LEGAL STUDIES “CESARE BECCARIA”

Learning objectives	<p>The programme provides high-level interdisciplinary training during which the doctoral student is offered the possibility of further study of law, with special reference to criminal law and procedure, Roman law, history, philosophy and sociology of law, and ecclesiastic and canon law.</p> <p>The programme includes lessons and active participation at seminars, during which the student will be encouraged to research different topics in detail. He/she will also be involved in research projects promoted by the Board of Lecturers and will be urged to write and publish contributions in the framework of these projects.</p> <p>During the three-year period, the student will write an original scientific paper under the supervision of one or more tutors. The paper may be interdisciplinary.</p> <p>A number of courses and seminars may be conducted in English. Part of the programme may also be conducted at a foreign university or research institute.</p>

DOCTORAL PROGRAMME IN MATHEMATICAL SCIENCES

Learning objectives	The doctoral programme in Mathematical Sciences aims to teach students the research techniques and methods typical of the sectors of contemporary Mathematics and their applications, both qualitative and quantitative, so as to obtain the wide ranging scientific and cultural autonomy required to produce original and significant results. The programme will produce graduates with expertise in exploiting the full potential of mathematical tools and methods and statistics to tackle the intrinsic complexity of problems posed by the applied sciences and industry. The first year syllabus includes advanced theory and workshops held by international scholars chosen by the Board of Lecturers to offer students the opportunity to establish direct contacts with the international scientific community. Doctoral students will have personalised courses under the guidance of a tutor. Once mandatory attendance of courses and examinations are completed, students can concentrate on their chosen research project. Students are assessed on the basis of their doctoral thesis, to which the three-year doctoral programme dedicates considerable attention.
Academic disciplines	01/A (Mathematics) 09/H (Computer Engineering) 13/D (Statistics and Mathematical Methods for Decisions)
Duration	3 years
Places available	9
Scholarships	9 University of Milan
Contact person for the doctoral programme	Prof. Giovanni Naldi, full professor in the MAT/08 scientific-disciplinary sector giovanni.naldi@unimi.it
Admission criteria	All classes of second cycle degrees
Reference letters	The Teaching committee requires that two reference letters, drawn up according to Form 2 (available here), be sent by email to the referent.

Doctoral programme selection phases:

Date of CV and research project assessment	7 September 2015
Assessment outcome	Available from 8 September 2015 on the website http://www.mat.unimi.it/dottorati/
Timetable of tests	<i>Interview:</i> starting from 15 September 2015 at 9.30am at the

DOCTORAL PROGRAMME IN FOOD SYSTEMS

Learning objectives	The aim of this doctoral programme is to prepare researchers and scholars specialised in nutrition with international standard methodological know-how, autonomy and specific skills in scientific research on food systems. With these learning objectives, the doctoral programme in Food Systems envisages many cross-sector research topics: food technologies, process control and innovation, microbiology of foods and bioprocesses, food chemistry and biochemistry, human nutrition, ecology of agri-food and agri-environmental systems.
Academic disciplines	03/A (Analytical, Chemical-Physical) 03/C (Organic, Industrial) 03/D (Pharmaceutical, Technological, Nutritional) 05/B (Animal Biology and Anthropology) 05/D (Physiology) 05/E (Experimental and Clinical Biochemistry and Molecular Biology) 06/D (Specialised Clinical Medicine) 07/A (Agricultural Economics and Rural Surveying) 07/C (Agricultural, Forestry and Biosystem Engineering) 07/D (Entomology and Plant Pathology) 07/F (Food Technologies and Agricultural Microbiology)
Duration	3 years
Places available	8
Scholarships	7 University of Milan
Contact person for the doctoral programme	Prof. Francesco Bonomi, full professor in the BIO/10 scientific-disciplinary sector francesco.bonomi@unimi.it
Curricula	1. Chemistry and biochemistry 2. Agri-environment 3. Food Science and Nutrition

DOCTORAL PROGRAMME IN HISTORY, CULTURE, SOCIAL AND INSTITUTIONAL THEORIES

Learning objectives	<p>This doctoral programme centres on the historical background of society, culture and institutions, considered in all its complexity and dynamics. Various perspectives can be briefly summarised as the expressions of cultural, political, religious, economic, institutional and administrative life. Appropriate tools will also be provided for a detailed study of methodology and correct use of sources.</p> <p>The primary aim of doctoral programme lessons is to develop the capacity of doctoral students for advanced standard historical research. To achieve this goal, they will be offered the necessary material and instruments to autonomously define an investigational method. The programme is designed to cultivate the critical sensitivity of doctoral students enabling them to understand the character and unfolding of events and ideas in their ideal formulations and factual expression, and to promote in-depth knowledge of the tools useful for this purpose.</p> <p>Besides rigorous methodology, doctoral students will also acquire specific competences and know-how, supervised by teaching staff assigned to the programme. In this field, the interests of members of the Board of Lecturers range from the multiple facets of historical and institutional issues to archival studies, paleography, bibliography and publishing, from historical methodology to economic history, from religious history to the history of thought.</p> <p>These objectives are also intended to promote internationalisation, favouring a broadening of horizons through periods of study abroad and an international teaching approach.</p>

DOCTORAL PROGRAMME IN LINGUISTIC, LITERARY AND INTERCULTURAL STUDIES IN EUROPEAN AND EXTRA-EUROPEAN PERSPECTIVES

Learning objectives	The doctoral programme, which ranks as a third cycle programme, promotes advanced training for research on a broad spectrum of languages, literature and cultures of different geographical areas (Europe, Africa, the Americas, Asia), and on correlated interlinguistic and intercultural phenomena. Besides basic methodological training, the learning objectives of the various disciplines are organised by research area and according to geographical and socio-cultural criteria. Doctoral students will first complete the learning activities of their area in detail through personalised lessons and workshops designed to encourage autonomous research in their respective sectors. Moments of common training will also be offered, centred on contacts between the various linguistic areas involved, and on the three sectors – linguistic, literary and intercultural – already specified in the title of this programme. Training also includes learning to use analytical IT tools, which are extensively exploited in the international framework. The programme will train international scholars, in the true sense of the word, fluent in several languages, skilled in understanding and discussing the scientific research of other European and non-European institutions, and able to mediate between Italian and international studies.
Academic disciplines	10/E (Philology and Middle Latin and Romance Literature) 10/F (Italian Studies and Comparative Literature) 10/H (French Studies) 10/I (Spanish Studies) 10/L (English and Anglo-American Studies) 10/M (Germanic and Slavic Languages, Literature and Cultures) 10/N (Eastern Cultures) 11/A (Historical Disciplines) 13/C (Economic History)
Duration	3 years
Places available	9
