

Mentors (2023-2024)

From the XXXIX cycle on, PhD students are required to choose a Mentor among the ones listed below, avoiding those who are working in the same research group. PhD students have to: 1) ask the Mentor his/her availability; 2) inform the PhD school; 3) schedule at least 1 meeting/year with the Mentor.

The Mentor shares his/her personal experience and technical expertise, ensures the support and the resources you need to develop your projects, gives advice for your future career. The Mentor promotes the welfare of the PhD students and can help you in solving conflict/inconvenience situations.
